In this paper, we present an.Q: How to get a workaround for the system of equations in MATLAB I'm interested in solving the following system of linear equations:  $20y = -(xy + xz)$   $17y + 12z = 0$   $14x + 7z = 0$  I could use solve to solve it, but I would get a different solution because MATLAB doesn't recognise  $-(xy + xz)$  as a vector. What I want to do is to ignore the first equation when solving the second one, which implies that the first equation is not known. I would like to have a workaround so that I
