The clipboard keeps tracks of the texts you need to use while working on any specific machine. Quick Copy Paste Shortcut for Windows 7 without Installation Features: Use the exclusive shortcut to copy, paste, and keep any text without installing any freeware. Optional clipboard can double as a source of tracks for word "hot or soft" Description: Quick Copy Paste Shortcut for Windows 7 without Installation We can say that the clipboard is one of the most important core features of any computer system today. Almost everyone in this world has personal data and information stored in a text document. You can even be updating a website URL, or even sharing a link on your Facebook account. The clipboard is the common data source for all text files. When you have decided to manually enter the information in the application and click on the Clipboard button, you will be prompted to select a default destination. While choosing a destination, you can choose the tracks from your past events. When you have completed all the steps and want to share your text, you can click on the Send to Clipboard button. Unfortunately, the Clipboard application has a limited number of slots and these are hard to use. For all the windows users who are looking for a stable clipboard application without installing any third party application, we are here to provide the solution. Multiple slots to save custom text strings The application comes in a pretty lightweight package, and it doesn't even require installation to be of use. This means you can also carry it around on a thumb drive with ease, just in case you want or need to use it on other computers than your own. Registry entries are not affected, so the health status of the target PC remains intact. As far as the visual design is concerned, the application offers everything in a classic window frame. There's not much to look at, with several empty fields representing the slots you get to use in the process. Each is fitted with a button to send the particular string to the clipboard so you then easily insert it where needed. Quickly send strings of interest to clipboard The general copy operation is not affected in any way. The default clipboard is still the transition mode for copy and paste strings, so the application only holds custom strings, which you need to manually paste in the appropriate slots. Unfortunately, there's no possibility to have hotkeys assigned for better pasting capabilities. The application doesn't minimize to the tray area, and it can take a little desktop space. Sadly, there's no option to make it stay on top of everything else. In case you want to have it ready by the time you reach the desktop, a neat trick is to add a shortcut to the system startup folder. A few last words Bottom line is that the clipboard is an incredibly helpful feature, even if it only comes with a single slot by default. NippyClippy doesn't really come as a clipboard enhancer, but rather to offer physical view space of items you decide to store and quickly use at any given moment through the clipboard. NippyClippy is a minimal, lightweight application that gives Windows users one convenient place to store a series of short text strings. It only requires installation. No access to the registry is necessary and if you like, it can be removed without any damage to the system. The application is written with ease of installation in mind. Just drag and drop the.zip onto your Windows desktop, and it will run without needing any intervention. Choose from one of three slots that can store a series of strings and then easily copy and paste them on your computer. To make the application run smoothly and not waste system resources, it does not display a splash or loading screen when you run it. NippyClippy is compatible with all Windows platforms from version 95/98 through to Windows 7/8/10. Using NippyClippy gives you the option to store a series of text strings in the three available slots. You will be able to instantly see what you have stored with the help of a preview window. One thing that is really nice about NippyClippy is that it does not affect the health status of your system. You can use it with full confidence, and you can safely use it on any PC without having to make any registry changes to your operating system. NippyClippy is a minimalist application that offers only one feature. However, there are a number of issues that are sure to cause difficulty when you want to try to use it. First things first: NippyClippy does not come as an installation application, but an executable file packaged in a.zip archive. Next, the application is not a clipboard enhancer. It is, instead, a tool to let you store some words or phrases you want to use in the future, and to easily retrieve those bits of information. Once you have downloaded the application, you'll be presented with the choice of saving the application to the desktop. It will not minimize to the system tray area, so it will constantly be there, cluttering up your desktop area. Finally, the application does not come with any kind of help file. One of the problems encountered while using the application is that it does not offer any screen shots to illustrate how it functions. Instead, the only video available is the one that introduces the application. The one that does the trick is not particularly exciting, and it is no substitute for a help file. The terms of the license offered by the developer is pretty

Tour - The old quarry is now a display of 10 vintage mills and a museum. It is open at the same times as the museum, but is free of charge. The biggest state park in the state and the largest state park in the east. With 575 acres, Clay Creek is twice the size of Mt. Pisgah State Park. On over 100,000,000 dollars of improvements to the park, make it a mountain gem. The Late 19th and Early 20th Century Railway Railroad History: The right-of-way for the railroad was originally purchased from local citizens through the efforts of H. J. Lawson. The railroad was originally laid down in the 18th century and used to transport stone, coal, and timber into the 1800's. In 1891 and 1892 the West Tennessee Steel company, which used the railroad as a movable railway, constructed the West Tennessee Valley Railroad, which included a main line, spur, and a section of the railroad which runs through the park. After the West Tennessee Steel company left the railroad to the public, the state of Tennessee took possession of the West Tennessee Valley Railroad on April 1, 1910. In 1917, the Carnegie Foundation and many civic, business, and religious organizations contributed to the plan for a park. Construction began in 1918, and was complete by the early 1920's. The state of Tennessee had no idea what to do with the railway. The state considered
