The book of Aung San Suu Kyi, taken from the title of the German documentary film of the same name by David Redhead that won the Best Documentary Screening

Award at IDA Berlin.Genome-wide identification of Fusarium head blight resistance genes in wheat. In recent years, resistance to Fusarium head blight (FHB) has become an important trait for wheat breeding. In

this study, we have identified a set of 85 putative genes encoding resistance to FHB in tetraploid bread wheat. The majority of these genes, including 21 resistance genes previously described from Chinese

germplasm, may provide a pool of novel genes for gene discovery. A subset of these genes were functionally characterized by PCR-based screening of targeted gene deletion mutants from the wheat TILLING (Targeted

Induced Local Lesions IN Genomes) mutation population. We generated homozygous mutants in which the putative genes of interest were effectively knocked out, while the wild-type genes were intact. In addition, we identified homozygous mutants for a target gene using the nullisomic-tetrasomic method in the Chinese

Spring nulli-tetrasomic lines. The aim of this work was to provide a basis for future functional characterization of individual resistance genes in wheat.Q: How do I find the XSD schema used by an Xml
