Wordshield

The Wordshield utility is a small tool, that encrypts the clipboard content while you type the message into the selected field. As soon as the text is pasted into the default text editor, all the clipboard data is deleted, leaving only a shield in its place. Just press the hotkey of your choice, and the shield will be placed around the message you are copying, protecting it until it reaches its destination. The encryption includes 128-bit AES, providing enough security for common users. You can also adjust the encryption strength, for more security. You can access the application's settings and control the application directly from the settings menu, which is shown after pressing the application's shortcut key. All the information is shown in the application's settings. Key Features: Simple, yet versatile, compact and customizable application Select as many as 20 different hotkeys, for easier control Three different encryption methods Protect both the clipboard and a custom text field Selectively or exclusively encrypt the clipboard Replace the clipboard entry with a shield when text is copied Overlay the encrypted message on top of the application icon in the system tray Encrypt the message when typing or pasting Protect the clipboard content even when the application is closed Program Requirements: win2000, win7, win8, win10, win8.1, win7sp1, win8.1sp1, win10sp1 How to Activate: After installing the Wordshield application, simply open the directory where you saved it and double click on the Wordshield.exe file to start the application. Wordshield is a small tool, that allows you to protect and encrypt your clipboard content. With this program you can encrypt the clipboard content and then paste the encrypted version to the default text editor, deleting the clipboard entry in the meantime, for protection purposes. You can set the application to operate using 20 different hotkeys. Usage: The Wordshield utility is a very useful tool. It is quite easy to use, you can just press the hotkey of your choice and the message you are copying to the clipboard will be encrypted, safe in its own shield. - Copy an encrypted message from the clipboard to the default text editor. - Paste an encrypted message to the default text editor. - Paste an encrypted message to the text field. - Delete the clipboard entry. - Change the hotkey to any of the 20 possible combinations to manually protect any message. - Activate the clipboard protection or encryption

Wordshield Crack+ Registration Code Free

Wordshield is a simple yet efficient utility that can safeguard the clipboard text from others. The program encrypts the text you paste and saves it in the clipboard buffer, so that it cannot be accessed by anyone else. If a user tries to do that, Wordshield opens the file up and decrypts the text. The application also lets you copy the text to the selected text field without performing

any other action, which is useful for simple text editing. Key Features: • Quick and simple secure text messaging with customizable hotkeys • Create password protected files • To copy, paste or hide messages in a text field Wordshield License Key: License key is needed to activate your license. License key help you to get all features of the software. Please note that you must have internet connection to activate license key. License key is not bound to any product, it is free to download and use. You can download any time, anywhere, if you have internet connection.License key can be downloaded any time, anywhere, if you have an internet connection. If your product is fully licensed, you have access to all the features it contains, including lifetime updates. If your product is not yet activated, you will receive an email containing your license key. Please activate your license by clicking on the link sent to your email, and all the features included will be activated. For your protection, we highly recommend that you never share your license key, unless you lose or uninstall the software. 09e8f5149f

Wordshield Crack

WordShield (formerly WordPerfect SecureClipboard Shield or WP Security) is an easy and effective tool designed to protect your data from prying eyes. Made for people who are concerned about the security of their data. Wordshield (formerly WordPerfect SecureClipboard Shield or WP Security) is an easy and effective tool designed to protect your data from prying eyes. Made for people who are concerned about the security of their data. Key Features: • Works with all local text editors (e.g. Notepad and RTF / Rich Text Format) • A shield surrounds the clipboard content when you press one of the hotkeys. The clipboard content is deleted while the shield remains. • Compatible with all modern text editors and programs. • The program automatically monitors the clipboard and encrypts it if required. The clipboard entry is deleted while the shield remains. • The hotkeys are stored in the registry to keep the numbers, hotkeys, and password safe. • Safeguard your communications until they reach their destination. • An inline password control window to keep passwords safe. • User settings for the copy, paste, and hotkey process. • Control system tray status. • WordShield is a complete stand-alone application that does not affect the clipboard function of the default application. • Large list of options for customizing the behavior of WordShield. • All messages are reported as correct, thus they are not visible to others. 2013-06-14 · Dave @ DaveWare.net When chatting with friends, many times you may be typing a message in one chat window and they are typing a message in another chat window and you might want to send them a "what I just typed in chat" message. Below is a script that will pop up a menu that contains the last few messages you have said and lets you send them to the recipients chat window in a pop-up message. 2013-06-14 · Dave @ DaveWare.net When chatting with friends, many times you may be typing a message in one chat window and they are typing a message in another chat window and you might want to send them a "what I just typed in chat" message. What's New In Wordshield?

Empower yourself with a simple, yet efficient utility that can assist you in encrypting the clipboard content on the spot, so that the text messages you send to others don't get intercepted by others. Combining simplicity and security, Wordshield can safeguard the messages that end up in your clipboard and then paste the encrypted version to the default text editor, deleting the clipboard entry in the meantime, for protection purposes. By pressing one of the shortcut keys, a shield is placed around the clipboard text, keeping your private messages private. The application makes use of the Rijndael/AES-256 cryptographic cipher to encrypt the text. Access via the system tray The application runs in the system tray, remaining at your disposal. It does not interfere with the clipboard functions, unless one of the shortcut keys are pressed, but note that it will replace the copied content if used. There are four usage alternatives for Wordshield. You can use it to encrypt and paste the text within the selected text field / application, encrypt and paste to the default text editor, copy the text to the editor without performing any other action or copy the message to the selected field while also encrypting or decrypting it. Please note that the decryption function might fail to work properly if you don't select the entire encrypted string. Safeguard your messages until they reach their destination Wordshield is a handy tool for all computer users, enabling them to encrypt text messages in an instant, using custom hotkeys. It sits silently in the system tray without interrupting your work, but immediately reports for duty once you press one of the set key combinations. Key Features: 1. Key features are highlighted with a red box. 2. Customized usage is highlighted with a yellow box. 3. A fixed site logo is used to provide a consistent branding to Wordshield. Manifest Key Features: 1. To use the fixed site logo, you need to manifest the data into your manifest file. 2. If you don't want to use fixed site logo, you are free to remove. Read more at
