In the first place, it's a sound recording of his call with the FBI. He's also purported to have 'lied' to Congress. Did he do this? He was asked several times. No response. He can't answer that. He's lying? In the second place, there's no actual fact that he lied to Congress. What he says is that he didn't reveal the fact that he was told to be silent about how the dossier was paid for. He wasn't asked about this, and there's no disclosure that he's been asked anything else at any time. He can't answer any questions about that either. In the third place, his lying about it wasn't a 'criminal' lie, as some are claiming. He wasn't under oath when he said it, and he had no reason to tell the truth under oath. He was just a guy talking to his pals.

In order to support this we must
