Screenshot Saver is a lightweight application that can help you take screenshots of your current desktop in the easiest way possible. It boasts a simplistic interface that can be easily handled even by less experienced users. The application provides two different modes for carrying out such a task, as you can manually take multiple screenshots, or enable the automatic mode.

When activated, this latter mode allows users to take a snapshot by hitting the “Print Screen” key on the keyboard. The program also keeps a log with the actions performed and possible errors, but the log cannot be exported to a file. You are

allowed to preview the images that you have taken, in the main window of the app. As a major drawback, the program is only able to copy the images to the Clipboard, so it doesn't offer users the possibility to save them to file. Since it's only able to capture the entire screen, you could use Screenshot Saver with a separate photo editor to quickly crop a specific area of the screenshot. It cannot be considered the most powerful tool in its category, as it lacks many advanced features and configurable parameters. We would have liked to see support for editing tools, various file formats (e.g. JPG, GIF, PNG), and the possibility to choose the area of your screen to be saved. However, Screenshot Saver remains light on the system resources, and no errors showed up during our testing. It surely appeals to beginners who need to take multiple snapshots without having to

configure dedicated parameters.

Key features of Screenshot Saver - Detailed description of the features of the program and the contact information for support - Various templates that are used to take screenshots - Several preset sizes and positions for the screen - The possibility to choose where the image will be saved (e.g. clipboard, folder) - The possibility to preview the screenshots - The possibility to choose whether to take the screenshot manually or automatically - The possibility to choose whether to take the screenshot to a folder or to the clipboard - Built-in profile manager

Fetch request not sent on direct request This is the URL I'm making to fetch the datas. When I use \$ch = curl_init(); to initiate the curl request I get the data, but when I

use `$ch = curl_init();` to request the data without any post or get request or whatever, I get no data. Can someone help me out? A: PHP, curl, and SSL don't just magically know that you're requesting the page over HTTPS. You have to tell curl that the request is over HTTPS.

```
curl_setopt($ch,  
CURLOPT_SSL_VERIFYPEER,  
false);

A small application written by one of our active programmers. A: This is for Windows, but you can probably customize it to do something similar for Linux. As far as I know, there's no equivalent for Mac OSX. You can use Microsoft's Windows FIND command to find duplicates. It will tell you how many times a file is on the disk. Example of how to use it

```
C:\WINDOWS\system32>findstr /s /v "/E " "testfile.txt" 5 testfile.txt A:
```

You can use GNU find: `find. -type f -newermt 2014-07-15 -print0 | xargs -0 md5sum` This will generate a list of all files in the current directory sorted by file creation time in descending order and print the results. If you do not have GNU find then you can install it using your distro's package manager. You can also use the following command

to do the same thing using the -exec option to GNU find: find. -type f -newermt 2014-07-15 -exec md5sum { } + Last updated on.

From the section Football Manchester United's poor start to the season has been "too slow and too studied", according to Sir Alex Ferguson. United are now four points behind leaders Liverpool and are winless in their past five league matches. Ferguson insists he will not be dismayed if his side slip up at home to West Ham on Wednesday. quote I think we've done everything we can and done the job we should have done. I think we're good enough to win the league "We have to take confidence from the last 20 or 30 games," he said. "We didn't lose until after Christmas last year. "We had to keep up the momentum because of what we achieved at the end of last season. "But we have made the slow start too slow and too studied." The

5-0 aggregate defeat by Barcelona in the last 16 of the Champions League has caused a shake-up in United's preparations for the Premier League campaign. After Friday's match, the players go into a two-week break while coaches and team officials concentrate on finishing the season in the Champions League. Sir Alex Ferguson admitted he would rather the slow start to the season had been made up in the Champions League
