But it worked out. As you may have guessed from the title, this year was the 20th Anniversary of the first edition of the MSF Manual. My initial plan for the anniversary was to create a website with all the information, but I quickly abandoned that because there was so much information. So instead I'll just post a couple of years worth of old posts here. Just a quick note to tell you that I've published my fourth book: The Subcontractor's Guide. This book will help you avoid common pitfalls and successfully manage the contractual obligations of your subcontractor. It's a practical guide to managing subcontractors (and contractors) and key issues you'll encounter: Do you manage your subcontractor like a business? Be prepared for an audit Validate work before you pay Negotiate work scope Manage change orders Get copies of project records Contract terminology and clauses I have three more books in the works, so I should be publishing them by the end of the year, but it may take a few weeks to get them out there. An update to my rules of book writing: Why I don't write cookbooks. OK, I knew it would happen. I'm not so obsessed with the book that I can't leave anything out of my work and still make sense, but eventually some day I'm going to write a cookbook. So that's what I have this year. And I also have a DTB book that's going into its second edition. I hope to have those out in the next two weeks.Nintendo Consoles Are Shaking The Money Tree Consoles are generally considered to be well protected.
