... CSV Splitter is an application for splitting CSV files. CSV can be useful when you want to insert data from a table into an Excel worksheet, but Excel has a limit of 1,048,576 rows. CSV Splitter has options to split CSV files, like multi-sheet worksheets, multiple CSV files, or multiple smaller CSV files. ... How to use: To open CSV Splitter, go to Start -> All programs -> Run (or Start -> Open) the tool. You will see this screen: Click Choose File. Navigate to the folder where you want to open the CSV file. Click OK. In case you only have one file to open, skip Step 4. Click OK. The CSV Splitter window will open and you will see a screen with several tabs representing different modes in which the tool can split CSV files. Click the Start Mode drop-down menu or a corresponding menu to get started. Selecting a Split Mode The name of each mode provides an explanation of what it does. You can follow the instructions below to start. Splitting with a single spreadsheet: In this mode, you will open a spreadsheet file that contains the input CSV file. Each sheet represents a column of the CSV file. To open a CSV file with a single spreadsheet as Split Source, Click Start. Navigate to the folder where the CSV file is located. If you want to split the CSV file into different worksheets, or different tabs in the same worksheet, select that option and click OK. Otherwise, you can just click OK to proceed without specifying the amount of sheets. Click Browse. Navigate to the folder where you want to open the CSV file. Click OK. Click OK. The CSV file will be opened as the first sheet in your newly created spreadsheet file. The sheet should be in the first tab of the spreadsheet. If you open a CSV file with only one sheet as split source, the tool will be able to generate thousands of tabs (different worksheets) depending on the specified split number. So it is important that you have 2GB of free disk space on your machine in order for the tool to work. If you only have one CSV file to split, skip Step 5. Splitting with multiple CSV files: In this mode, you will open multiple CSV files that contain the
