Most cases of HIV-associated dementia (HAD) are associated with HIV encephalitis, a complex inflammatory process in the brain. The source of this inflammation is believed to be viral proteins or viral-infected macrophages or microglia. Recently, studies have suggested that expression of the chemokine receptors CCR5 and CXCR4 on macrophages and microglia are associated with disease progression. However, the specific role of CCR5 and CXCR4 in the pathogenesis of HIV-1 encephalitis is unclear. Previously, it has been demonstrated that neuroinflammation is regulated by IL-18, and IL-18 gene deletion is protective against experimental autoimmune encephalomyelitis (EAE). Therefore, I hypothesize that loss of CCR5 and CXCR4 on microglia and macrophages is protective against the development of HIV-1 encephalitis by altering the microglial activation state from a deleterious to a protective phenotype. To address this hypothesis I propose the following specific aims: 1. Characterize the role of CCR5 and CXCR4 on microglia in the development of HIV-1 encephalitis. Microglia isolated from brain tissue of wild type, CCR5 and CXCR4 null mice will be used to evaluate the role of CCR5 and CXCR4 on microglial function. The ability of microglia from CCR5 and CXCR4 null mice to phagocytize and kill virus in vitro will be evaluated

What's New In?

Intuitive customization: To deliver a truly personalized experience, AutoCAD software has been updated to offer a wide range of customizations, from themes to font and colors, to aid in your workflow. (video: 5:14 min.) Enhanced Productivity for Your Work Flow: To make your work flow more productive, AutoCAD software has been updated to include a more intuitive user interface, enhanced customization, and a new tool that enables you to keep your drawings organized at the level of topics, not individual objects. (video: 1:25 min.) As with every release of AutoCAD, this year's release of AutoCAD includes many new features and enhancements, for greater ease of use. You can also download the current version of AutoCAD if you are still using it. From Windows workstations, Mac and Linux, Microsoft Office and Google Docs, you can now use AutoCAD to view and annotate Microsoft Office Word, Excel, PowerPoint and OneNote files. With these collaborative features, you can share your data with others who use these file types, as well as download, import and view files, comments, drawings and text annotation in the same manner as you use other native AutoCAD data. With AutoCAD 2020, you can work with 3D objects and add associated text and annotations to your drawings. Now, you can move, scale and rotate 3D objects, as well as add the appropriate amount of text and annotations, with ease and speed. The Arc and Surface tools now display three levels of annotation when enabled: Critical, Optional and Not Applicable. The BuildTicket Builder, an optional feature, allows you to create a BuildTicket or Build TOC from one or more design documents. The Digitize tool enables you to add a digital signature to your drawing. You can now add a signature to drawings and views in either one step or multiple steps. You can also include a

signature for all drawing, view and 3D objects, and you can sign with your company, location, or profession. Scoring tools are now available to let you use either one of two built-in scales to analyze or compare parts or features for quantity or quality. You can now use the modeling tools in Create-Lines and Create-Polylines to more easily create both linear and circular features. The tools available for collaboration in the
