A plugin can add a feature to a drawing. The drawing can be a 2D or 3D drawing. AutoCAD 2007 includes the command-line interface and can be scripted through the Graphical Programming

Environment. The graphic symbols are stored in DXF files that contain the geometry and appearance information. DXF is a graphical format based on ASCII text, which can be edited using several text editors. However, AutoCAD 2010 uses the DXF Standards instead of text-based format. Subscription products are the newest AutoCAD feature. These products are AutoCAD-based, can be obtained either as a part of a bundle with other products or can be bought individually. AutoCAD models, text, and styles are made available to subscription users. Workgroup Server AutoCAD WS is a set of network services that allows a user to synchronize and publish drawing and model files. These are viewed in an independent viewer application, Workgroup Viewer. AutoCAD WS provides means of sharing and publishing files between AutoCAD and other applications like Microsoft Word, Microsoft Excel, Quattro Pro, and Excel. This allows creation and publishing of templates, templates are contained in files that specify which commands to execute, which objects to use and how many times. When a drawing is uploaded to the WS server, the drawing is synchronized with other concurrent user's local copy. It has the ability to create and edit blocks, layers, styles, and other drawing elements from the server. Users can also view other users' edits. In addition, editing of drawing files can be remotely done. This can be used to edit the same file in the field while using a portable computer. It also makes it easier to update and sync with a remote office. The AutoCAD WS contains two modes: "local" and "remote". "Local" mode is for a single workstation to be used. "Remote" mode is for multiple workstations to be used. In the "local" mode, editing operations are not allowed from the server. In the "remote" mode, editing operations can be performed. Since a drawing is synchronized with other local workstations, it is also safe and secure as no data is saved on the server. Web Applications Autodesk provides several web applications based on AutoCAD. These include Web Applications in Architecture, Web Applications in Engineering, AutoCAD Web Connect, AutoCAD LiveLink, Auto ca3bfb1094
