About us: Moscow studio Argus Games (UNPAYABLE CRIME) has launched a new mini-series of games - the first, titled "The Prisoner" About Argus Games (UNPAYABLE CRIME): "Argus Games is a unique Internet-gaming studio, set to revolutionize entertainment and to change the world in the future. On the technical and tactical level we aim to achieve something unique, beyond the sum of the typical genre's competences. We offer a unique gaming experience, combining artistic high-quality image with creative gameplay and strong storyline, packed with an interactive narrative. To draw the adventure, we use computer graphics. We believe that they are able to depict stories and characters with a vividness and a truthful quality that is closer to the real world, providing a positive atmosphere to the game. We believe, that computer-generated graphics are an amazing tool to express the notion of, for example, love, sadness, and other human emotions. We would like to take advantage of this characteristic, to deliver a unique gaming experience and appeal to modern games players. We are a small company made of about 20 people. Currently our main product is "The Prisoner", and "Arrow Fall II", an online RPG with a big story, which will be released soon. Our games will be available for download in the Internet, on the site " About Our Project: SHORT FILM ("ПАТРИКА" ФИЛЬМА) GRAND NEWSREEL (ОБУЧЕНИЕ СИКЕРА) GIGAKHOVSKA (KALEIDOSCOPE ОБУЧЕНИЕ) About The Game П747: About the Game П747: Number of versions - 3. Claim Your Heritage: Enter a realm filled with ancient ruins, forgotten treasures, and immense power that opens its pathways to you in the role of an interceding Hero. Defend your home from the force of evil or rise to new heights of power as you build a life free of rules. The actions you take in Dragon Age: Origins define who you are. Your life, as much as yours. Even your future.

Discover Dragon Age: Origins: Discover old and lost Magery in the Highlands, follow the political turmoil across the land and start your journey in Dunain, with all four classes of Hero, Wizard, Thief, and Rogue playable and customizable.

Powerful Characters: Create the Player you want to play. Choose from a collection of 7 complete character classes, each with their own special abilities, for some of the most interesting, unique, and powerful characters of any BioWare game.

Highly Customizable: Make your character unique. Build their appearance, their companions, and their skills. Each character has 6 unique choices in Race, Class, Trait, Attribute, Skill, and Superiority that make you and your character unique.

Gameworld: More of a huge world than a city. Join thousands of players in an interactive world. Explore a vast and detailed environment with amazing character and voice acting. Search through over 180 areas to find the weapon, spell, and armor you'll need to survive.

Tales of Awakening: Follow the story of two heroes. Travel the main story with the Hero of the past and create one's own Destiny with the Warrior of the Present. As you explore different stories, take on challenging side-quests and new party members who will form a bond with you. There's adventure, romance, and excitement for anyone to experience in a Dragon Age: Origins.

The Demon's Legion: Hide in stealth as you fight in the shadows. Eliminate Val'Griffor's minions anywhere. Outwit and out-race. Harness the epic power of your Eidolon in style. The demons of the Legion terrorize the

===== My name is Rob Cartwright (also known as rainews.net's CEO, creative director, founder and editor), and I'm one of the founding developers of Gatling 2. After creating dozens of games as a kid and a young adult (including the pretty successful iOS game Twisty Fights), I decided to start working on my own full time. I've been working on this game for the past six years, and it is now finally, finally ready to be released.

published:11 Jan 2017 views:1037540 NEW CHALLENGE: For this month's eClubLogic challenge, we decided to create a robot that tells jokes. So, we programmed one, and we asked some other students to try and find a way to make it say jokes. This is the result. We hope you enjoy the eClubLogic episode, and if you want to make a video like this, you can refer to our "Produce a video about the world around you" tutorial here: Don't forget to check out our other video about AI: published:22 Jun 2017 views:23678 my first Robots, the one that is learning to sleep...and learn a lot of things too...people have showed interest and thought of me as a teacher of robotics, which I love and love to teach for all of you. I would love to teach one day in university of Botswana and so in order to go further thinking of providing ideas how to make this robot a practical one I love to design this without any sensors from the pieces available in the local market, for a cheaper cost, no laser, no camera, no Raspberry Pi or Arduino, just simple with relay and battery as a power. also to add some motion to it for the goal I love to make an ECT robot, a e-learning conference table robot. want to learn about me? My brother is getting married in a couple months on October 11th and we are interested in creating a robot that dances like that mess from Tokyo Jungle. We were thinking of using the Tron Lightcycle model as we've seen in toy stores

## What's new in Battle Royale Simulator:

Ha ha ha...What a cute little bridal dress ;-)  
You guys look so cute when you have a matching outfit for your wedding. Your wedding dresses look super awesome and your jewelry fits perfectly. I also love the little embellishments. The applique is really nice as well. And the flower, wow...I just love that dress... I especially love the bouquet on Bride's Dolls. It looks so natural and lovely. The stem on one of the flowers is a bit bent due to the pose but it's nothing that a bit of hammering can't fix. Everything about this outfit is adorable. The whole thing looks perfectly authentic and I love how carefully you chose the accessories and fabrics. In fact, how many perfect pieced dresses can you find?!? I especially like the details of her clutch and hat. You really paid attention to details and colors, even with the wedding dress, which I think is my favorite of the two! :) I really like this outfit, from the outfits online to the accessories, there is really nothing I don't like about it, and I think it is wonderful. I especially liked the hat, it is wonderful details like that I don't see often, I will give this hat to a friend before I wear the set, thanks. I love the outfit from cosplay contest. I love the flower, the petals and the cherry rosettes are so delicate and refined. I like the bridal sleeves and how you put the flowers in front of her buns. It looks charming and cute and very realistic. My favorite of the three. what a cute outfit. i think you have a style, i think that it is somehow a bit sad...put your evil grins on, i am just kidding :)really sweet outfit but a little bit simple. i do love the hat and the whole set is really cute^^ it's not your typical wedding accessories. the hats i wouldn't wear in daily dress, but in a dress with an open back the hat would blend well with your persona.the "gladioli" shoes in picture two looks incredibly tiny and narrow but they fit well when you have that dress with a with a matching flower in your hair and the top part of your dress is soft and tight ;). but it is the ideal style for your wedding. the name "gladioli" sounds more masculine for the home where i would wear them.the

## **Free Download Battle Royale Simulator [Win/Mac]**

Warzone 2100 is a turn-based strategy game set during a post-apocalyptic world, with tanks, infantry, and artillery units. The player directs a large war machine through a procedural generated battlefield. Strategic decisions must be made, along with the right kind of weapons, while enemy units can be spotted early on and when the conditions are right, ambushed and destroyed. In the end, the player can win or lose the war, and this means exploring all the different ways to do that, at high level of detail. The RPG philosophy of Warzone 2100 is to have as much units, formations and weapons as possible, being ready to tackle any situation with the right combination of tactics and strategy. And everything has a price. Designing the AI of the enemy is a difficult task, but the long game engagement between the players allows the game AI to be as smart as you want, so it can be a bit frustrating at times. - The main game runs in real-time. Each turn has a very high dynamic and the players are represented by various units, making them interact with each other without cutting the scene into static shots. - In turn, you get the whole military-tech arsenal of the game at your disposal. Infantry, tanks, aircraft, artillery, submarines, you name it and it will be present. - Building a powerful war machine is not trivial. There are many ways to improve your army, but you'll have to manage budget, resources, and limitations. - Armed with the appropriate strategy, you can set up your turns for a victory, and there are a lot of ways to do that! - The smart enemy AI will take advantage of your weaknesses, when it detects them and you don't have the means to defend yourself. - The game features mod support, so you can modify almost everything, with the official upgrade software included, along with a lot of possible add-ons that can augment your strategy and turn the game upside down in a matter of minutes! - The game has been created in Unity, with a Steamworks publisher module, allowing us to release the game for free, with a Steam Trading Card and achievements support, allowing a lot of feedback from the community! This is the standard version of the game, as part of Warzone 2100, the full version of the game includes as the base game the content included in this standard version, plus all the content included in the other versions of the game, with an option to access to the secret/
