Gameplay This game is an old school RPG, in my opinion, which is based on the Japanese style. They placed a focus on having a good story with a deep and lengthy story. The main difference between this game and other anime/manga style RPG games is that they did not use complex menus for battles. The battles were made in the real world, fighting enemies in the real world. The battles can use up to 8th level spells in combat. The most interesting part of the battle is the fact that the arena is divided in 4 zones. The first two zones are the main battle areas, the first with your opponent and the second with you. The other two zones are shown on the sides of each battle area, showing the various effects on your character. The colors that you see represents what type of attack your character is performing. All in all, it's a very simple system, but the battles in general can get complicated very quickly. The class system is the following: There are 5 classes, each of which is made up of 13 magic classes. A major difference between the classes is the amount of attack, defense, attack power, and defense power. The mages for example, have the most powerful attacks. The Cleric has the most defense power. Your first choice will be the character class, then there are 5 magic classes, each of which gives the ability to perform a certain kind of spells. Each class includes many kinds of different spells and they can also use equipment to improve these spells. You can switch between classes and magic classes with a special system. Each class can improve the spells and equipment. It's a system that is strange to me, but it's still very nice. Most of the items are obtained in the world. You are able to buy things with gold and money. Gold can be obtained from defeating enemies and gathering resources such as wood or ore. The graphics in the game are very nice. Although they do not follow the anime/manga style, they do follow the cartoon style. The voices are also very good. They are inspired by the original Dragon Quest. It's quite clear that this is an RPG game inspired by the Japanese style, however, it's very nice to look at for those who want to play this game. Story It's a very old school fantasy RPG, in my opinion. The story is based on the book "Dome of bff6bb2d33
