FIFA Ultimate Team (FUT) is the ultimate celebration of football and is every fan's dream. Create your own dream team from over 25 million players, all with their own unique personality traits and abilities. Choose to manage them, buy and sell them, trade and clone them. FUT offers fresh challenges and ways to play in every game. FIFA 20 now allows you to create your own custom attributes to change your playstyle. We've also made lots of small changes to make the game feel more like a true celebration of football.

**ATTACK MODES** New Ball Physics – Feel the ball react more realistically as you strike it with your feet. Quicker and more unpredictable flight patterns make it even more fun to play football. **Player Impact** – Players now react more realistically as you touch the ball and head it into the air. Instead of being immobile, your player's momentum is affected, making every dribble and pass even more dynamic and exciting. **Impact Engine** – The Impact Engine is the foundation of FIFA 20's new attacking play mechanics. With the new Impact Engine, players perform differently under pressure – lean into challenges or lean back as you receive the ball. Players apply more pressure and acceleration to the ball as their skills and abilities improve. **VARYING DEFENSIVE TACTICS** **New Pitch Shape** – The pitch is now responsive when playing from the back, making it more difficult to play free-kicks, or send through on-target passes. **WIDE RECEIVING OPTIONS** With FIFA 20, players can now earn more chances to receive the ball outside the box. Players can run through the ball and drag-through when receiving crosses, while a new challenge put into the defenders' hands offers new tactics to defend. **LEAGUE-SPECIFIC TACKLING** **Movement Changes** – Players now respond better to off-the-ball movement in
