The Employee is a comedy game where you'll find yourself in an office. There is a strong feeling of ennui in the atmosphere. The game is about throwing things around. Each task has its own particularities. For example, it could involve determining if a file is malware or not. You have to check the code line by line and find the problem. Or, it could be the task of finding a missing file. You have to do this by walking through each room in search of the object. You will be lucky if you're able to find the object on your way! The experience is very interactive. You won't just be watching a movie, you'll be playing with your mouse as your characters with a storyline. You can ask your colleagues to help you solve a problem and accept their suggestions or reject them. More than that, you can play the game in this way, or you can accept the missions one at a time. No tutorials, no game guides. All the game is inside your head. You have many ways to win the game. The game has multiple endings, choose the right way and you'll see what happens. The game has a large amount of configuration possibilities for maximum gameplay. The game can be played in many different ways, giving you the freedom of deciding the speed, how much things make sense and even how the plot unfolds. The game can be played by yourself, meeting NPCs and ending the game without any failure. The game can be played with up to 4 players, allowing for a large number of different gameplay styles. Even if you don't know how to program or game at all, if you have spare time and a mouse, you can play the game on your own. It's as easy as telling your mouse to jump and to play. The Employee is a comedy game and from the first seconds you'll see it, you'll be happy. Feel free to improve the game, create your own characters and write your own story. Thank you very much. About the Artistic Style: The Employee is a single-screen adventure with puzzles and problem solving. The game looks like a movie cut in the middle (a comic book for example). The game has a graphical style typical of the 90's. Everything looks like it could have been done in the Web from 1994. The graphics are cartoon like in the sense that everything seems to be 2D. However, this

The Ancient Ones are waking once again - they are searching for the lost city of Shambhalla. Who will be the last to stand? In a time before the first cults, a dark prophecy foretold of a day when civilization would fall. Your destiny awaits… The Others The Ancient Ones Shambhalla Rules: Move your unshovel around the board. See what happens! Press the space bar to select a card. The number associated with each colored hexagon represents a stat you need to improve. The more gold you have, the further you can move your unshovel. No command? No worries. If you think about it, it's pretty easy to win if you have the right strategy. This is a lot of fun for the whole family. We tried it and we have to say that we had a blast. Shambhalla is a game for 2 to 4 players, with up to 4 victory points per player. It took us only 2 hours to get to level 20 after we had started to play, and about a month or two to beat the campaign. It's also a good game for 2 to 4 players and 2 hours. Spiked Age is a clone of the game Shambhalla. We saw it in the game section of the Sharefest, and we wanted to try it out. We have the following feedback: Good game. There is enough strategy to keep you engaged. The tutorial takes a while to get through, but it will explain things better than we do. It took us 3 hours to get to level 20. We beat the campaign in just over one hour. We also beat the challenge mode. This is super easy. Beat the dogs and the horse twice, or beat the wall 10 times, and you're done. We did the same with the plains and the castle. Showing off the well-crafted graphics of the game is an obvious highlight. Do note that

there are some small issues: Some of the battles are slightly wonky. We don't know if they fixed it in the dlc, but it happens when you have 10 or more of a type of enemy. Sometimes you get one or two more than you should, and sometimes you get a few less. The third world is a little buggy. You can
