with.1. Field of the Invention The present invention relates to
the field of telecommunications and, in particular, to a system
and method of protecting the security of data in a caller ID
service of a digital cellular telephone network. 2. Related Art
Many digital cellular telephones today can obtain caller ID
service information. In a typical caller ID implementation, a
mobile service provider uses a special look-up table or
database to locate an identification number (caller ID number)

for a calling party or a telephone number associated with the calling party. The telephone number is provided to the digital cellular telephone as a caller ID signal for display at a cell site of the digital cellular telephone. e79caf774b
