Powerful tools Photoshop is one of the most powerful image-editing tools available. It includes the following features that give you flexibility in creating your own art from scratch:

Adjustments The Adjustment Layers allow you to change the opacity, tone, and hue of your image, and save the alterations as a layer so that you can use them at a later time. The Adjustment Layers are especially useful when you want to keep the changes of a particular adjustment and alter the other aspects of the image. Photoshop has many preinstalled adjustments with names such as Exposure, Contrast, Shadow, Brightness, and Saturation, to name a few. You can also create your own adjustments. Using the Adjustment Layers, you can make as many alterations as you want, saving each adjustment as a separate layer and blending them together.

Blur The Blur Layers allow you to adjust the bluriness of an image, thereby creating a softening or hardening of it. By blending the three settings of Blur, Gaussian Blur, and Radial Blur, you can create amazing blur effects that are perfect for your photo or drawing. The Adobe Photoshop Monochrome option also

allows you to create mono-colored images. Color The Color Layers, such as the Hue, Saturation, and Luminance, allow you to add and adjust the color of your image. These Layers are particularly useful for making adjustments to skin tones.

Using the Color Layers, you can get a multitude of different colors and adjust their intensity to create something amazing. It's also useful for painting, inking, and creating new colors in your photos. Gradient Using the Gradient Layers, you can create a gradient in any direction of the image. The Gradient Editor is a feature that allows you to create and adjust a gradient from an existing color or image. You can then save the Gradient as a Layer that is placed on any other image.

Glyphs The Glyphs Layers allow you to apply different shapes, pattern, or text as a layer. The Layers in this option are perfect for creating creative logos or typography effects. Using the Adobe Illustrator (included with Photoshop) option, you can add text to your images. Layers The Layers Layers option allows you to

Back in the summer of 2000, the then-4-year-old Denzel Washington was returning home from a day of practicing his acting chops at C.S.A. in L.A. The actress Crystal Harris says she saw him on the corner of Santa Monica and Wilshire, and says he told her he wasn't in the mood to make any new movies. "[He told me,] 'No, baby, don't make any plans. Let's just leave this in God's hands, and let's just keep doing what we're doing,'" Harris told Access Hollywood. "So at that time, I thought it was cool to hear from God at that time." And that was the gist of it. The two were still emailing back and forth, she says, and soon she was even taking the billionaire's calls. "I was thinking, It's Denzel, you don't call your mother, your wife, no one," Harris recalled. "You call a woman who is not just any woman but someone who has been there for you." At the time, Harris was in Los Angeles working on her own acting projects, and hadn't even gotten in touch with him for more than a year. She ended up staying at the Beverly Hills Hotel to meet him. "God's going to bless you in ways you don't expect," he said, giving her the good news. "He doesn't promise that he's going to use you, but he will make you prosper." When her movie career started taking off at the age of 19, Harris says she began to notice some things about Washington, from his spiritual side to his generosity. "After seeing him in a box office film, I never seen him in a box office again," she explained. "I thought, oh my gosh, he's an

honorable man. He's not a selfish man. He's not a tyrant. He's not a bully. And so I started seeing that in him." To learn more about Harris and where she's at right now, check out the video below. A new method to measure the diameter of

... Just because you don't get a reply from a potential employer, doesn't mean the job offer is not real. There are ways of checking if a real company behind a job vacancy. And not only because fake applicants will not use your services or will give you a bad feeling. In this tutorial you will learn how to find companies by visiting the source of an invitation for a job offer, and other tips. Checking companies If you want to know the real company behind a job offer, you have to visit the company's website and make sure it really exists. You can do that with the aid of the browser and the cache. Click Ctrl+Shift+Del to clear the cache. Add dns suffix to search You can also add a few details about the company to narrow down your search results. Type in the address field. This will add dns.my to the search results and it will narrow down the search results, making sure your potential new employer really exists. Add keywords to search Another way to narrow down the search is adding keywords to the search. In Google for example, you can type the keyword in the search bar. In the same manner, you can type terms that could describe your purpose of applying for a particular job, your

intended place of employment, your desired professional experience or any other relevant details that will lead to your target company. Whois search If you found a job offer from an unknown source, you can do a Whois search to find out more information about a company. You do this by typing Whois www.dns.my/companyname in the browser address field. Always keep the simple things in mind when listening to music. A little bit of music goes a long way!
