This new DLC now equips you with a suitcase that improves the quality of all items in your inventory. It's completely optional. Follow us on Facebook: Find out more about the game: SpaceCraft - an action-adventure game for the PC, where players have to fix all the broken machines of a space station and save its inhabitants. Starting with a simple SpaceCraft, we have over the years added many features to the game, including machine guns, RPG-weapons, attacks, enemies, bosses, a very complex dialog system and a lot of side quests. The DLC adds the option of equipping your arsenal with a suitcase that improves the quality of all items in your inventory: a pistol, a pickaxe, an ax will be exchanged for a submachine gun, a mythical pickaxe and a mechanical axe. And of course the capsule with bullets does not fall out of your pockets anymore. Power of the SINKR!

- Need to remark: I sometimes lack time to develop SINKR's features.
- SINKR has been developed in Microsoft Visual Visual Studio.Net targeting all Windows XP/7/8/10 systems.
SINKR is possible on systems running .NetMono, including Linux and MacOS.
- SINKR is presented on a web site and game channels by the '.NET Mono', the '.Net Game Framework'.

SINKR supports multiplayer mode.

SINKR is stable on Windows XP, Windows 7, Windows 8 (don't need microsoft.net-compat."dll.)

For MacOS and Linux, SINKR run at the moment with Microsoft.Net-Compact-Framework .Net Framework Mono.
