There's no reasoning against Ink Paper Minesweeper! It's a real paper minesweeper game, you just need ink. The game is centered around the art piece called "Hoppy Cat". Together with you, Hoppy and his friend, the game is about revealing the path of a falling ink ball on a piece of paper. Each time you move your mouse, the ink ball falls down from the top of the piece, revealing a more and more of the picture. By clicking (or lifting) the mouse, you can move the ink ball up and down. When you lift your mouse and the ink ball is touching it, you can drag it. With the ink ball touching the back side of the paper, you have to lift your mouse once more to remove the ink ball from the paper.

About The Game's Style and the Base-Pack Artworks: The Ink Paper Minesweeper series originally started in 2013 with the game Ink Paper Minesweeper. It was showcased on several games festivals and game shows. Later, the project got a new level of interest from the community. It's great to see how people react to it, it's like a special kind of gift each and every time. In mid-2018, the platform "Appbot" released a new version of the game which included a packed base-pack of 13 awesome paper cutouts by Edward Penfield. The base-pack is a curated set of the best artworks of Edward Penfield which have been re-created by you using ink. Here's how you can get the base-pack in the app: 1) Download the Free app on your mobile device. 2) Tap on the in-game menu button (top-right corner). 3) Under the "Papertricks" category, tap on the third "Papercut". 4) Now, you're ready to download the base-pack. When you've finished downloading the base-pack, you're ready to play it on Ink Paper Minesweeper. About The Author & Contributors to the Game: The game Ink Paper Minesweeper is made by Solomon Van der Roost (NintendoWorks) and me (Fons van der Aa), together with other contributors to the platform. TS Marketplace: British Railways S15 Livery Pack Add-On Features Key:

- We have 3 maps packed on your game. Each map has 3 corners and its own end, through which the the enemy walks on. They will use one option when moving towards the end, which is naturally good since it won't force them to be outside enemies view. Because of the low polyitecture of the maps, we tried to keep the dimensions safe. Later will also have more maps that will set end on their corner.
- Dummy opponents who use automatic skills that will shoot at enemy standing in their view.
- Some objects like crates, chairs, tables and decorations will be used to limit the map size when playing, like the hero who is supposed to move, but not too far, or even go under the table or close to the window.

Join Lightning War Game team through Kickstarter

- We will have a Kickstarter, which will let you follow and take part in our development. Until the completion and release of our game. You get a reward for your pledge until that time, so you'll get to beta-test our game. You also get to tell us the things that you feel are missing in the current prototype. We will see if we can include all of those features in the game or provide even more.
- We will beta-test your game and you can if everything is OK tell us which problems you found and what could change in game design.
- We will give you and if you have a feedback help us to fix some problems.
- We will be grateful to the backers who are willing to contribute to our project and do what they consider necessary for its completion.
