something.Q: PowerBI - How to use a a variable in a calculated field I need
to use a variable to create a calculation in PowerBI. For example: I have this
table var @A = 1 var @B = 2 I need to have this calculated field:
[Percentage] = (A/B)*100 I know that I can create a measure that I can use
to create a calculated field. The problem is that A and B are dynamic fields
that I get from data importing. I need to have the percentage calculated
based on the value of A and B. Is there a way to do it? A
