“Technologies like FIFA Ultimate Team are part of the evolution of the sport,” said David Rutter, FIFA Executive Producer. “We have always looked at what is happening in real-life football and asked ‘how could that inform the game?’ And, we’ve started to apply that into our teams.” Here’s some of the FIFA 22 features tied to real-world ball movement: Ball Movement FIFA 22 models every last inch of the player from the front to the back of the foot, creating individual players with ball lifelike movement. Natural player movement and realistic ball physics now exist in one environment for the first time. Three-Level Ball Control High-level player intelligence is incorporated into AI when they control the ball, allowing them to make accurate passes and play-the-ball instructions. Players that control the ball will have better passing through spaces, both vertically and horizontally, and improve the ball’s range of movement. Club New Free Kicks FIFA 22’s Free Kicks offer a new and improved system that takes player movement and movement of the ball into account. There are three options: One-Touch, Open Play and Defen-SV. The one-touch system allows the player to boot the ball with one touch and ensures there is no side spin on the ball. The player can also decide to kick from the free-kick spot to limit side spin. The Open Play Free Kick can be placed from any spot on the pitch. Lastly, the Defen-SV Free Kick can be placed from anywhere on the pitch. FIFA 22 also features improved goalkeeper progression, new Free Kicks and a reimagined Keeper Command Centre. Grading The new Rating System allows you to fine-tune how you play by allowing you to run your own progressions. Keepers, defenders and midfielders are all assessed against different Skill Tests, Goalkeepers against Defensive Skill Tests. Balanced Player Progressions Every technical aspect of the game has been analysed, from players’ weights, to taking into account the styles of play and tactics that they use, in order to create balanced player progressions. AI Strategy FIFA 22 features a new AI strategy system that allows players to influence the decisions of the opposition. Choose to set up an aggressive style of play or launch a deep counter-att
