crashdribs.com SPOILERS Alderaan was also claimed by the Republic and was the location of Zsinj's base for a while. The Second Death Star had its foundations built on Alderaan. Alderaan was a planet that was destroyed by the Death Star to delay the Rebel attack against it, along with most of the planet's population. Salvage the

Alderaan Storyline So what if we take into account an earlier meeting in which the Rebels are told to avoid Alderaan because of the planet's "blight and decay" - clearly, destroying the planet just to change the name of the base is hardly the correct way of implementing this rule. Alderaan was destroyed in a "shock and awe" attack by The Empire during the events of Episode 3. It was known that the planet was heavily defended by the Death Star, so a plan to destroy the planet was created. The plan involved wiping out the population and leaving the planet as a memorial, allowing the Rebels to hit a non-defended target. The attack was carried out by the Empire after the Death Star was activated, in order to delay the Rebels' attack against the base. In order to reach the near-light-speed speed needed to reach Alderaan in time, and bypass the power shields protecting the base, the Death Star was boosted to maximum power. Empire Admiral: "Have you completely destroyed it? There is no structure still left." Obi-Wan Kenobi: "We have. It's absolutely. Destroyed, sir. Sorry about that." The Death Star's power shields were lowered, allowing the Death Star to travel to Alderaan, and the planet was destroyed. As a result, the base was left vulnerable to attack from the capital star systems

of the galaxy. During the attack, Mon Mothma noted the name of the base, and was seen aboard her ship, the Invisible Hand. It was later revealed that despite this plan, many of the Alderaanians had survived the destruction and that many of them were in hiding. One of these escapees, R2-D2, found Palpatine hiding on a planet in the Sullust system, so the Emperor returned to the Imperial capital. Learn the Alderaan Thread.
