* **** Photoshop Elements: Photoshop's sister program, Photoshop Elements. Elements works almost exactly like Photoshop CS but is a lightweight program that uses raster graphics. With Photoshop Elements, a beginner can create two-dimensional and three-dimensional effects, cut an image into various shapes, and merge several images into a single photo. It's not only a quick and easy way to create a photo, but it offers excellent editing features for text and graphics. * **** Photoshop Lightroom: Photoshop's lightroom. A centralized and fully integrated photo-editing and management application that handles both editing and organization in a single software suite. * **** Lightroom is the predecessor to Adobe Photoshop Lightroom. It is an application that edits and manages your photos and other imaging elements. You can also use Photoshop for photo editing, but Lightroom is more than just a photo-editing program. It's a full-featured editing and organizing tool that enables you to edit and organize your photos in a single environment. Adobe Lightroom 4 is truly revolutionary and offers many benefits that really elevate the photo-editing process. It's a powerful tool that allows you to create, edit, and share images, all in one suite.

Effects of ezetimibe monotherapy versus combined ezetimibe-simvastatin on serum lipid levels and carotid atherosclerosis in hypercholesterolemic patients. Ezetimibe is a cholesterol absorption inhibitor that improves lipid profile in hyperlipidemia. Data on its effect on carotid atherosclerosis are scanty. Our study aimed to investigate the effects of ezetimibe monotherapy and ezetimibe-simvastatin (EZE/SIM) combination on serum lipid levels and carotid atherosclerosis in hyperlipidemia. Fifty-seven hypercholesterolemic patients were enrolled in the study. Patients were randomized into three equal groups: placebo, EZE monotherapy (10 mg/day), and EZE/SIM combination (10 mg/10 mg/day). Lipid profile and carotid artery intima-media thickness (IMT) values were measured at baseline and follow-up. Of the 57 patients, 34 were males and 23 were females. The mean age of the study participants was 48.9 ± 8.1 years. During the study, 25 (44.6%) were dropped out, 17 (29.8%) in the EZE group, 7 (12.3%) in the EZE/SIM group, and 5 (8.8%) in the placebo group. No significant difference was found between the three groups in terms of baseline characteristics. At the end of the study, there was a significant reduction in both serum total cholesterol (P
