0 I have installed a clustered hypervisor in my computer. Dual core 3.46 GHz, 4GB RAM, Windows 8 32bit. I'm trying to use php to create a web page that has javascript and the page should show an error message if I run the web page on a computer that doesn't have a clustered hypervisor installed. I don't know how to make an if statement or an else if statement to make the page work when I am running this script on a computer that doesn't have a clustered hypervisor installed. if(!defined('SERVERINFO')){ die('This web page can only be run on clustered hypervisor computer'); } A: I guess this is the way to add to your if statement: if(!defined('SERVERINFO')){ if

(GET_SERVERINFO() == "clustered hypervisor") { die('This web page can only be run on clustered hypervisor computer'); } } This requires some PHP development though. Q: Full text search with @-special character I am trying to create a full text search in my app with TFS 4.0. The problem is, my app is multilingual, and words might contain special characters like @, ä or ö. In order to use those characters with @ I tried to replace them with a placeholder character as described in the following thread: How to use a special character with Lucene.NET's Full-Text-Search? I tried it like this: -query "@ĎĚĘĘ_NAME_OF_MY_MODEL+@" But this results in the following exception: System.ArgumentException : Invalid 'ĎĚĘĘ_NAME_OF_MY_MODEL' format string! If I replace "@ĎĚĘĘ_NAME_OF_MY_MODEL+@" with a multicharacter word like "som_name_of_my_model" -query "som_name_of_my_model" this works like a charm. The problem is: I would like to replace a text string like "som_name_of_my_model"

A: If you want to stop this error you can get rid of it by upgrading the Windows because it has been known that the latest Win10 Update and the previous Win10 Update introduced a new vulnerability in its OS. So better to update the OS because the update does not affect your system but it will definitely update the existing updates so that you can permanently stop this error. Next, downloading the official theme templates and app styles might not affect your system because I know that you have downloaded those already. So, please keep your system updated. If your OS is not the latest and you want to reinstall then don't download the official theme templates and app styles and just go with any other theme or any other program. If you don't want to upgrade your OS then you can always uncheck the official theme templates and app styles but remember about it that you will remove it forever. If you want to upgrade your OS then check the official theme templates and app styles first and then you

can proceed with it. Q: $\int_0^1 \frac{\sec^2x-\tan^2x}{\tan x}dx=-\ln\sin\left(\frac{\pi}{8}\right)$ Evaluate the following integral. $$\int_0^1 \frac{\sec^2x-\tan^2x}{\tan x}dx=-\ln\sin\left(\frac{\pi}{8}\right)$$ I have checked with Mathematica, but I don't know how to evaluate this integral. Can you guys help? A: This is the integral representation of arctan. $$ \arctan(x)=\int_0^x\frac{\mathrm dt}{1+t^2} $$ Make the substitution $t=\tan x$, then $\mathrm dt=\sec^2x \,\mathrm dx$, and rewrite the integral: $$ \int_0^1 \frac{\sec^2x-\tan^2x}{\sec x} \,\mathrm dx=-\int_0^1\frac{\mathrm dt}{\sec t} $$ Consider your integral, then recall the integral representation of arctan again. $$ \frac{1}{1+\tan^2x}=\int_
