Version history AutoCAD 2000-2009 AutoCAD 2000 The first iteration of AutoCAD, AutoCAD 2000, was released on October 24, 1999. This release included improved implementation of the AutoCAD API and some new features, such as command line editing. AutoCAD 2000 was the first version of AutoCAD to introduce a commercial license which replaced the previous CADlite license. It was also the first version to support LINUX-based systems. AutoCAD 2000 introduced the "on the fly" concept, enabling the user to add any text or drawing feature in any scale and size at any time, even while the application was running. Other notable changes included (but were not limited to) unordered and unformatted text, multiple brushes, editable legends, and notepad-style editing. This early version of AutoCAD had a number of problems, such as compatibility issues, sometimes not allowing users to exit from a command, and the lack of a history of drawings.
