Arcv2CAD V7.0 A.02 [VERIFIED]

Updated February 22, 2015 (Arcv2CAD 7.0 A.02). Take notepad.exe to display the .LOG file. Implement /EVA and /EVT text labels for switch raise commands in the .LOG file. Go to the .LOG file. Open notepad and run the following command:  
cmd.exe /c You must then click the Back button to return to the previous page. Select Raise Switches to lift the .LOG file. Note that the .LOG file does not show all commands, such as /EVA or /EVT. The /EVA and /EVT commands will be displayed, but instead only one command line will be displayed
